

Task 7: Identify and Remove Suspicious Browser Extensions

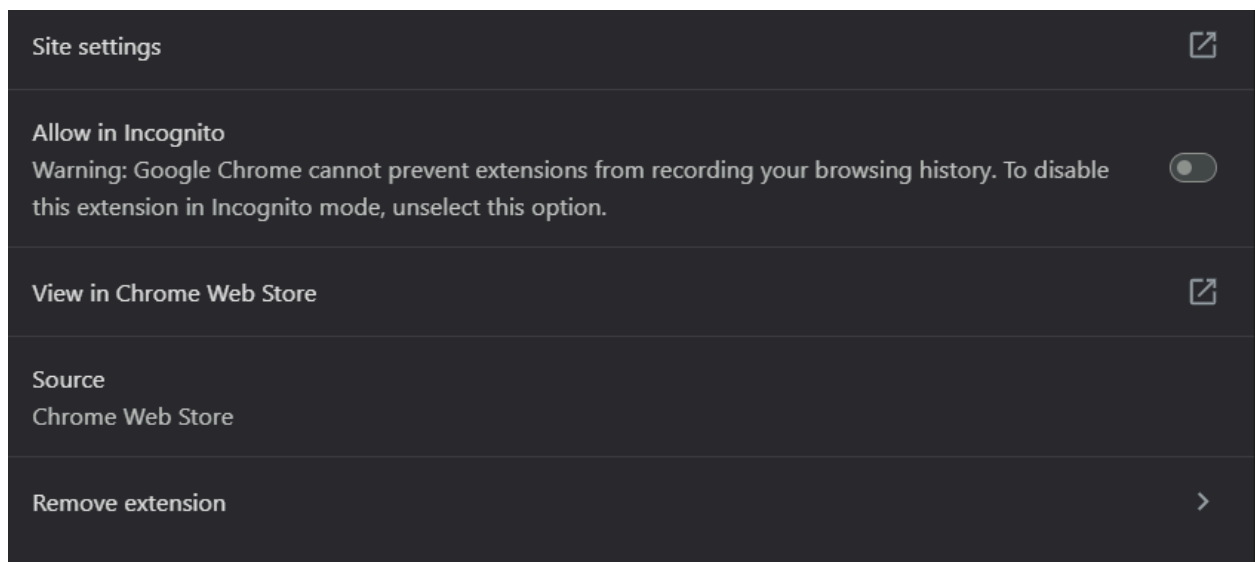

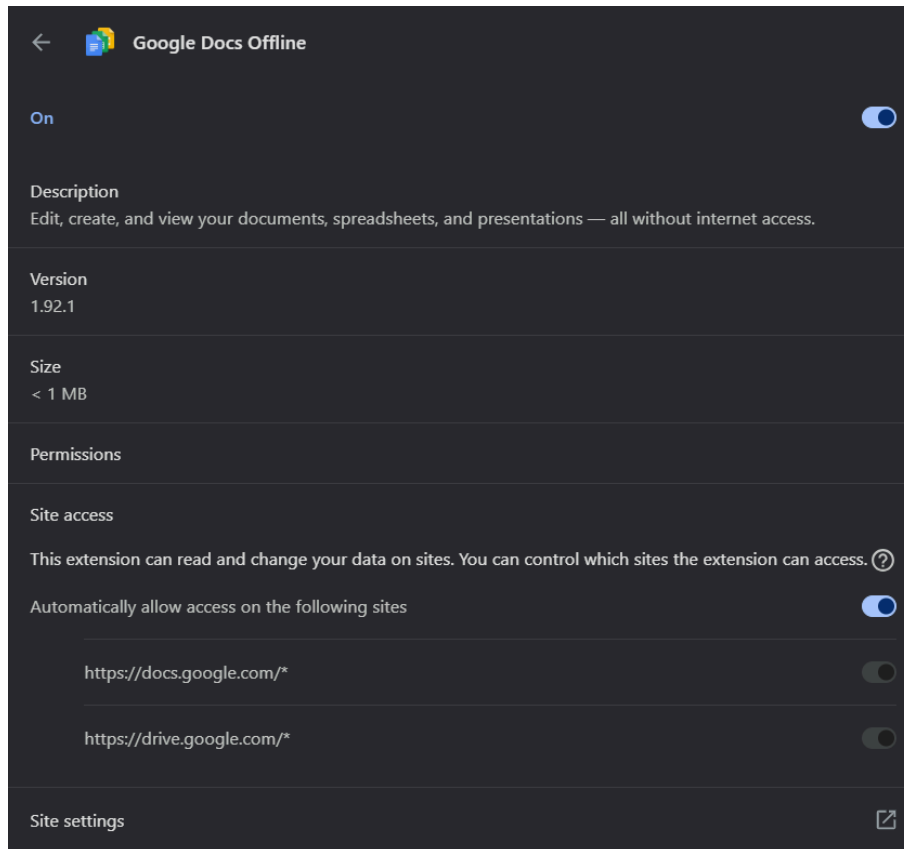

Browser Used: Google Chrome

Extension Manager Accessed: `chrome://extensions/`

Step-by-Step Actions Taken

1. Opened browser's extension manager
→ Navigated to `chrome://extensions/` in Google Chrome.
2. Reviewed all installed extensions carefully
→ Only one extension was installed:
 - Google Docs Offline

3. Checked permissions and reviews

- Source: Officially from Google
- Purpose: Enables offline editing of Docs, Sheets, and Slides
- Reviews: Positive and trusted on the Chrome Web Store

- Permissions: No excessive or suspicious access
4. Identified unused or suspicious extensions
 - No unknown or suspicious extensions were found
 - Google Docs Offline is safe and in use
 5. Removed unnecessary or suspicious extensions
 - None were removed as there were no unsafe extensions
 6. Restarted the browser
 - Fully closed Chrome and reopened it
 - Browser continues to run smoothly with no unusual behavior
 7. Researched how malicious extensions can harm users
 - Can track browsing history and steal passwords
 - Can redirect users to phishing websites
 - May display unwanted ads or slow down performance
 - Some install malware or spyware in the background
 8. Documented steps taken and extensions removed
 - Extensions installed: Google Docs Offline
 - Extensions removed: None (everything safe and verified)
